Spain has released its draft report on its climate program goals and expects to increase renewable energy to 80 percent by 2030, doubling its ...

Spain has competitive advantages when it comes to renewable energy generation, as it receives a high level of solar radiation and has significant wind ...

Spain strengthened its position as one of Europe's most dynamic clean energy markets in 2025, adding 8,852.7 MW of new renewable capacity, ...

OverviewDevelopmentEnergy PolicyEmployment in Renewable EnergyEnergy consumption by sectorElectricity SectorTransport sectorSourcesIn the early 2000s, the growth of wind power contributed to an increase in Spain's renewable electricity production. By 2021, wind and solar energy made up 23% and 8% of total electricity generation, respectively. The installation of photovoltaic (PV) plants beginning in 2007 played a key role in this increase, doubling the renewables' share in Spain's electricity mix from 20% in 2008 to 40% in 2013. After this period of ...

Spain renewable energy growth

The Spain Renewable Energy Market size worth 112.39 gigawatt in 2026 is growing at a CAGR of 6.78% to reach 155.96 gigawatt by 2031. ...
