-----

The technology enables power generation from limited land while reducing installation costs and improving project economics. Swift Solar's ...

The company said its perovskite solar cells generate up to 30% more power than traditional solar cells, improving the energy density and power ...

Swift Solar's proprietary tandem technology surpasses legacy silicon alternatives, generating approximately 30 percent more power than conventional panels.

Swift, which operates this facility in a quiet industrial neighborhood in Silicon Valley, is one of a growing group of companies experimenting with next ...

Swift Solar, the US pioneer in perovskite tandem solar technology, announced working with Plenitude for utility-scale pilot testing and evaluation of long-term supply arrangements.

Origis planned, developed and constructed the Swift Air Solar facilities in three phases, with the final phase delivered in late 2025. Collectively, these solar projects will represent more than ...

Swift Solar's novel perovskite tandem solar cells were integrated within the transportable microgrid being tested, and they successfully provided clean energy alongside two other power ...

Iron Pine Solar Power, LLC (Iron Pine Solar), a wholly owned subsidiary of Swift Current Energy, seeks permits to construct and operate an up to 325 megawatt (MW) alternative current photovoltaic solar ...

Swift Solar's perovskite-silicon tandem technology is expected to achieve module efficiencies of 28% or higher, compared to conventional solar ...
