-----

A pilot project in a Bern data centre tests iron-sodium batteries for combined load leveling and backup power, aiming to validate a safer, cleaner alternative to diesel generators and lithium-ion ...

Utility EWS AG and developer MW Storage have completed the expansion of a battery energy storage system (BESS) project in Switzerland ...

Swiss investment firm and pension funds manager Avadis Anlagestiftung has acquired a battery energy storage system (BESS) project at ...

Instead of chemicals like a conventional battery, the building uses gravity to store energy. Experts see such a technology as a potential game ...

This work provides insights into the design of high-kinetic and reversible Sb anode, bringing new selection of anode materials for ultrafast aqueous energy storage.

Discover how Berne Antimony Battery technology is revolutionizing energy storage systems for industries worldwide. In recent years, the demand for efficient, scalable, and sustainable energy ...

Battery storage systems are crucial for the energy transition. Find out how Swissgrid is driving forward their integration into the grid.

US-based iron-sodium battery storage company Inlyte Energy has teamed up with Swiss data center operator NTS Colocation AG to roll out its technology across NTS's facilities. The first ...

In Energy Vault's second deployment, it will supply Energie Wettingen, an independent public utility northwest of Zurich, with an 8 MW / 16 ...
