Tesla's batteries for businesses and utility companies (pictured here) provided energy for the big Powerwall unveiling on April 30, 2015. Tesla could ...

The first Powerwall was installed in May 2015. Mass production of Powerwall started at Giga Nevada, incorporating a Tesla-designed DC-to-AC inverter. September 2023 marked the release of Powerwall ...

The Tesla Powerwall is a rechargeable lithium-ion battery energy storage device intended to be used for home energy storage. The current generation Powerwall ...

We began investigating instances of fires in the US involving Tesla Powerwalls and found several examples. Now, two months later, Tesla has ...

In 2014, Drew Baglino was helping build Tesla's energy division with a passionate, scrappy team. Using parts from Tesla's vehicles, they created the ...

The combination simplifies installation and allows for even greater power delivery during periods of full sun. In May 2021, Tesla announced that it had installed 200,000 Powerwalls, selling 100,000 devices ...

The Tesla Powerwall might be one of the company's most understated products, but a look through its five-year history shows that the ...

This is a command line tool to retrieve Powerwall history data from the Tesla Owner API (Tesla cloud) and import into InfluxDB of Powerwall-Dashboard. This tool was submitted by @mcbirse and can be ...

As a Tesla Powerwall enthusiast, I thought it would be good to not only capture the history of the Powerwall-Dashboard project (as we did here) but to also chronicle the history of the ...
