---

It is generally estimated that the timescale for the first 5G networks will be around 2020, although there is pressure for some operators to launch much earlier.

South Korea launched the first 5G network in April 2019, followed by Verizon in the U.S. The Philippines led Southeast Asia's adoption, and Thailand became the first in the region with...

The first release of 5G, in late 2017 by the 3rd Generation Partnership Project (3GPP), was for non-stand-alone 5G New Radio (NR). In June 2018, the 3GPP finalized Release 15 (R15) for stand-alone ...

The United States has established itself as a global leader in the rollout and adoption of fifth generation (5G) mobile technology. 5G is the most ...

United States: Several U.S. carriers began rolling out 5G services in select cities in 2018 and 2019. Verizon, AT& T, and T-Mobile were among the carriers leading these early deployments.

It wasn't until early 2019 that the first 5G mobile networks rolled out. Verizon led the way in April with a relatively small 5G footprint in core areas of ...

Carriers began actively working on preparing this leading-edge cellular tech as early as 2015, but it wasn't until the end of 2018 that the first 5G mobile towers came online.

South Korea became the first country to launch nationwide 5G services. 2019: Major carriers like AT& T, T-Mobile, and Sprint began rolling out 5G services in ...
