The International Code Council (ICC) has risen to the occasion by developing a roadmap to bridge the gaps in codes related to the use, manufacturing, storage, testing, and recycling of ...

A comprehensive list of best practices around the design and integration of battery management systems that protect the safety and longevity of batteries in energy storage applications is ...

The 2026 edition of NFPA 855: Standard for the Installation of Stationary Energy Storage Systems has now been released, continuing the rapid evolution of safety ...

That said, the evolution in codes and standards regulating these systems, as well as evolving battery system designs and strategies for hazard mitigation and emergency response, are ...

Comment: The rule uses the term "stationary storage battery system" rather than "energy storage system," which is the generally-accepted industry term and used in NFPA Standard 855.

NFPA 855 (2026) now allows smoke detection, thermal-image fire detection, or radiant-energy detection for lithium battery storage. A ...

Lithium-ion cells contain stored chemical energy that can release internally and rapidly under failure conditions. Class L formally identifies lithium-ion battery fire behavior as ...

U.S. Codes and Standards for Battery Energy Storage Systems tallations of utility-scale battery energy storage systems. This overview highlights the mo t impactful documents and is not ...

Watch the energy storage systems webinar now to learn more about 2022 intervening code changes to Ch 12 in the Fire Code, residential energy ...

The latest lithium battery energy storage standards

This webpage includes information from first responder and industry guidance as well as background information on battery energy ...
