The UK's BESS capacity is set to triple by 2030. Discover how battery storage is crucial for decarbonization, grid stability, and long-duration storage.

As the UK moves forward towards a clean power system, alongside flexible gas generation, battery and storage projects will have a vital role in ...

Huge battery storage plants could soon become a familiar sight across the UK, with hundreds of applications currently lodged with councils. In ...

The UK government has included a fivefold increase in Great Britain's battery energy storage system (BESS) fleet in its plan to achieve clean ...

This is where the crucial role of battery energy storage systems (BESS) come into play, storing and releasing energy for when it's needed most. ...

A new era for renewable power and energy security begins today (Tuesday 8 April) as Ofgem launches a new cap and floor investment support scheme, unlocking billions in funding to ...

But what battery assets does the UK boast currently? How much capacity is under construction and consented, and what has the growth journey ...

High capacity and reliable rechargeable batteries are a critical component of many devices, modes of transport, and our evolving energy generation capability. Today we publish the UK's first...

The research by UK independent power producer Root-Power identifies 173 BESS projects, with a combined capacity of 7.6GW, likely to ...
