Why Is Renewable Energy Important?What Renewables Are Used to Generate Electricity?How Much of Our Energy Currently Comes from Renewable Sources?How Has Our Use of Renewables Changed?How Long Will It Take to Switch to Renewable Energy?Today, there are four main renewable energy sources used to power the UK: wind, solar, hydroelectric and bioenergy. They harness the natural power of the sun, our weather, our waterways and tides, and organic materials to generate electricity. Currently, the majority of the electricity entering the national grid from a single energy source is natura...See more on nationalgrid Energy DashboardLive GB Electricity Generation, Carbon Intensity & Demand - Energy ...Real-time half-hourly data on GB electricity generation, renewable vs fossil fuel mix, power flow visualisation and carbon intensity from National Grid.

New statistics published today by the Government confirm that renewable energy accounted for over half of the UK's total electricity generation ...

Check out the latest renewable energy statistics, covering the production, consumption, and capacity of the UK's green energy market.

UK's fleet of wind, solar and biomass power plants set records in 2025, Carbon Brief analysis shows, but electricity from gas still went up.

The booklet contains separate sections on the economics of the energy industry, overall energy production and consumption and trends in production and consumption of the major fuel sources,...

Data on the UK's sources of renewable energy, including capacity, electricity and heat generation, and transport fuels.

Find the most up-to-date statistics about renewable energy in the United Kingdom (UK)

Uk renewable energy production

heatTransportMicrogenerationHeat from wood fires goes back to the earliest human habitation of Britain. Waterwheel technology was imported by the Romans, with sites in Ikenham and Willowford in England being from the 2nd century AD. At the time of the Domesday Book (1086), there were 5,624 watermills in England alone, almost all of them located by modern archaeological surveys, which suggest a higher of 6,082, with many others likely unrecorded in the northern reaches of England. By 1300, this number h...

Renewable energy - considered crucial to limiting climate change - produced a record amount of electricity in Great Britain in 2025, BBC analysis ...
