University of Delaware is credited with creating one of the first solar buildings, "Solar One," in 1973. The construction ran on a combination of solar thermal ...

OverviewHistorySystems and principlesDesign concernsInfillsFire safetyMaintenance and repairExternal linksHistorically, buildings were constructed of timber, masonry, or a combination of both. Their exterior walls were load-bearing, supporting much or all of the load of the entire structure. The nature of the materials resulted in inherent limits to a building's height and the maximum size of window openings. The development and widespread use of structural steel and later reinforced concrete allowed ...

The reflective coating-Sunguard Solar Silver 20, which transmits only 20 percent of visible light and 15 percent of solar energy-would have ...

In June 2023, the Fengxian Qixian Jesus Church designed by Wutopia Lab was finally completed after eight years. It took me a little while to recall because I had changed a bit, and the ...

The concept of curtain walls dates back to the early 20th century, when architects began experimenting with non-load-bearing exterior walls. The idea was to create a facade that was ...
