When most of us think about renewable energy, we usually mean solar panels and wind farms. Although hydro or geothermal power make for ...

This argument rests on the idea that variable generation sources, such as solar, may be cheap in terms of the electricity they generate, but still drive up the ...

Musk argues that from all the solar energy directed to the earth, we humans only need a little part of it. Unlike the complex process of extracting ...

Elon Musk admires the sun as an almost infinitely plentiful source of energy. His solar projects reflect his interest, and the cost of solar is lower than ...

Renewable energy skeptics argue that because of their variability, wind and solar cannot be the foundation of a dependable electricity grid. But the ...

I believe you are stating that one source is currently not able to supply all power, but that would change if an economically viable form of energy storage were found.

US energy secretary Chris Wright has claimed solar couldn't supply all the energy the world needs. This is wildly and embarrassingly wrong, as ...

The Energy Department said wind and solar power are "essentially worthless when it is dark outside, and when the wind is not blowing." Energy experts disagree.

Renewable energy overtook coal as the world's leading source of electricity in the first half of this year - a historic first, according to new data from ...

Who says solar power is the only source of electricity

"Humanity"s history is full of energy transitions that moved from one dominant source of energy, such as whale oil or timber, to a more efficient ...
