Wind and solar power for the first time generated more electricity in the European Union than fossil fuels in 2025, driven by a surge in solar output, data from energy think tank ...

Wind and solar generated more EU electricity than fossil fuels in 2025, according to the European Electricity Review published today by think tank Ember. Wind and solar ...

Wind and solar generated more electricity across the European Union than fossil fuels for the first time last year, according to ...

This autumn update outlines the latest data for wind energy in Europe and our expectations for the rest of the decade. Europe now has 291 GW of wind power capacity, with ...

The wind energy industry in Europe dates back almost forty years, with the continent's first wind farm opening in 1982 on the Greek island of Kythnos. It had five turbines ...

We consider the latest developments in EU regulation, national policies, announcements of signed Power Purchase Agreements (PPAs), project development timelines and the ability of ...

OverviewEU Wind Power PackageBy countryEurope's Wind Energy EventPublic opinionSee alsoExternal linksThe European Commission introduced the European Wind Power Package in October 2023, which incorporates the European Wind Power Action Plan. This plan aims to streamline wind energy deployment by expediting processes such as permitting and auction design, with an emphasis on increasing investment in offshore wind and ocean energies. Despite EU wind generation capacity reaching 221 GW in 2023, additional efforts are required t...

Renewable energy plays a crucial role in the context of EU climate targets and energy security needs. Wind energy will be central to accelerating the roll-out of renewables and the green ...

Wind power generation in the EU

Wind power generation in the EU fell slightly in 2025 compared with the record year in 2024. Total EU wind generation dropped from 475 TWh in 2024 to 465 TWh in 2025, while wind energy's ...

Wind and solar generated more EU electricity than fossil fuels for the first time in 2025, marking a "major milestone" in the transition to ...
